AutoCAD for mobile devices AutoCAD for mobile devices Autodesk AutoCAD software is available for many mobile devices, ranging from tablets and smartphones to watch/gadgets and wearables. AutoCAD for mobile devices is currently available for iOS, Android, Windows, Mac OS, and web. AutoCAD LT, a Lite version of the software, is available for a limited number of mobile devices. AutoCAD is also available as a cloud service on the App Store. Versions Version 1.0 The first version of AutoCAD, released in December 1982, was only a basic 2D design package. New releases of AutoCAD through AutoCAD 2009 followed a paradigm where a new version was released every year, beginning in 1990 with AutoCAD 2000. However, since AutoCAD 2010, released in 2010, version numbers have not increased, only the release date has changed. In 2009, AutoCAD LT became available, at a lower price, as a competitor to the full version of AutoCAD, and as a way to support 2D design work in smaller organizations. Versions Autodesk Inc. officially started the numbering convention for versions of AutoCAD in 1990. However, Autodesk started numbering AutoCAD in 1982 and the product was first released in 1980. A summary of the numbering system is as follows: The version number designates the release year and the year of the previous release Release date designates when the release became available in the market Autocad CodeName AutoCAD 300 AutoCAD 200 AutoCAD 110 AutoCAD 100 AutoCAD 90 AutoCAD 80 AutoCAD 70 AutoCAD 60 AutoCAD 50 AutoCAD 40 AutoCAD 30 AutoCAD 20 AutoCAD 15 AutoCAD 10 AutoCAD LT AutoCAD LT 5 AutoCAD LT 4 AutoCAD LT 3 AutoCAD LT 2 AutoCAD LT 1 AutoCAD 1 These AutoCAD versions are the only AutoCAD products available on the market that can be customized using Add-ons. A new version of AutoCAD is released every year. Each version contains a change to the user interface

AutoCAD Serial Key/Map 3D AutoCAD Serial Key Map 3D is a family of AutoCAD software products supporting various 3D-modeling techniques. AutoCAD Map 3D consists of the following tools: AutoCAD Map 3D for desktop uses 3D Warehouse data to generate a 3D image of a site or environment; and to edit the site or environment data. AutoCAD Map 3D for web (formerly AutoCAD Viewer) creates 2D web maps and is designed for use with several web site servers. AutoCAD Map 3D for CAD is used for database connectivity and querying, to edit map data from ArcInfo GIS or 3D Warehouse in an enterprise geodatabase. AutoCAD Map 3D for mobile delivers web maps using a 2D-web-map technology. A.W. Bruecker, Matthew Miller, and Alan Woodall wrote that: The existing 3D Warehouse viewer and Map 3D are based on the same underlying technologies. AutoCAD Map 3D for desktop is available in three versions: AutoCAD Map 3D for CAD supports CAD data and is based on the.NET framework. AutoCAD Map 3D for GIS is based on the Windows GIS API and supports AutoCAD natively. AutoCAD Map 3D for Web supports AutoCAD natively and uses AutoCAD Map 3D for CAD as a backend. AutoCAD Map 3D for web uses an AutoCAD Map 3D Web Server to generate web maps. There are two versions of AutoCAD Map 3D for mobile. AutoCAD Map 3D for mobile is based on a.NET client server architecture and uses the same technology as AutoCAD Map 3D for desktop. Two-dimensional CAD applications can access 3D Warehouse data by using a feature known as spatial resolution. This allows spatial objects in a 3D Warehouse project to be made transparent for users ca3bfb1094
