GAMEPLAY Defender First Tactical Awareness - Manage a squad with the all-new Defender First Tactical Awareness by seeing and reacting faster to threats with new Tactical Awareness mechanics. Simulating the opposing team's movements - Now called Dynamic Opponent Control, FUT 2017's new type of tactical awareness allows you to gain control of the game quicker and make quicker decisions based on movement rather than being tied to where your teammates are. You can now join the majority of your teammates by changing the location of your defenders. At the start of every game, watch the Defensive Pressure gauge to see how your defenders are deployed. Using an F2 key, shift your defenders back or forward, temporarily move them closer to an opposing player, or even adopt a more direct alignment. Your defenders will now adjust their positioning depending on how you organize your team. Perfect Defending - Make attacking and defending fluid with a new refined, smart, and responsive defending system. Now defenders will see players during runs in-depth to make better decisions about when to press the opposition and when to remain passive, exploiting spaces at the right moment with maximum efficiency. Aerial Control - With a new control system that works in unison with the defender's positioning, you can make faster decisions about when to defend while still maintaining a high level of control over your defensive areas. Engaging the opposition - Expand on the improved dribbling in the new Dribbling system, making the ball just a little easier to control, and see defenders react more intelligently, thus giving you the opportunity to outmaneuver them more easily. More creative finishing - Leverage each player's individual qualities through the new Tempo-based Finishing system and the Evader system, which makes attacking runs more unpredictable as you create more chances. Quick and fluid dribbling - Combine the old dribbling system with the new Dribbling system and see your players take on the ball with the new total freedom to dribble past your opponent and create chances. Offensive Interception - More opportunities for your teammates to be ready for a pass.
